The prior art either alone or in combination doesn't teach the limitation of 63 of a computer apparatus operative in response to signals from a set of three keys located right next to each other on one horizontal row in the standard alphanumeric keyboard to control shuttling of playback of the video information from the one or more data files in the selected window at a shuttle speed and in a shuttle direction, such that a first of the three keys is for forward shuttling,

a second of the three keys is for pausing, a third of the three keys is for reverse shuttling, and

wherein:

the second key is right between the first and third keys,

a first actuation of the first key in a paused condition causes images of the video material to be presented to the user at a first forward shuttle speed,

a second actuation of the first key, after the first actuation of the first key and while image of video material are presented to the user at a first forward shuttle speed, causes a change in forward shuttle speed from the first forward shuttle speed to a predetermined second forward shuttle speed that is faster than the first forward shuttle speed,

a first actuation of the third key in the paused condition causes images of the video material to be presented to the user at a predetermined first reverse shuttle speed,
